A Polarization when the predator appears
χ max
paper ≈ 0.9
polarization Φ
alignment strength μ_alg
B Susceptibility
χ
alignment strength μ_alg
C Capture rate
captures per time unit γc
not fleeing (control), γc,NF
fleeing, γc
alignment strength μ_alg
D Escape ratio
R_esc = 1 − γc / γc,NF
alignment strength μ_alg
E Nearest-neighbour distance
distance (units of r_d)
alignment strength μ_alg
F Capture rate vs distance (R = -0.70)
μ_alg = 1.6
μ_alg = 0
μ_alg = 0.8
γc
nearest-neighbour distance
